PLANNING PROCESS

The checklist below provides basic steps appropriate for use in almost any incident situation. However, not all incidents require written plans and the need for written plans and attachments are based on incident requirements and the decision of the Incident Commander.

The Planning Checklist is intended to be used with the Operational Planning Worksheet (ICS Form 215). The Operations Section Chief should have a draft Operational Planning Worksheet (ICS Form 215) completed prior to the planning meeting.

Incident Objectives and strategy should be established before the planning meeting. For this purpose it may be necessary to hold a strategy meeting prior to the planning meeting.

The Planning Process works best when the incident perimeter and proposed control lines are divided into logical geographical units for planning purposes. The tactics and resources are then determined for each of the planning units and then the planning units are combined into

divisions/groups utilizing span-of-control guidelines.

The ICS Form 215A, LCES Safety Analysis, is intended to highlight potential problem areas. The Incident Commander, Command and General Staff would then consider reasonable mitigation actions or select a different strategic or tactical approach.
